USB Manager

Keeps your computers protected from USB attacks, helps meet IMO requirements, makes managing USB access simple and your I.T Team's job easier.

MAKES MANAGEMENT OF USB DEVICES SIMPLE

Blocks unauthorized USB devices from being accessed in Windows. Requires no set-up or configuration.

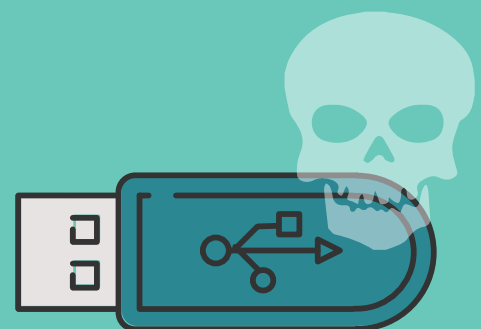

REMOTE MANAGEMENT

Manage access to USB devices across your entire fleet via our Cyber Detective web Dashboard.

PROTECTS YOU FROM NEXT GEN. USB ATTACKS WHERE ANTI-VIRUS FAILS

New USB attacks masquerade as trusted HID devices like keyboards. From our lab tests, Anti-Virus will probably not protect you.

INDIVIDUAL USER ACCOUNTS

Restrict access to USB storage devices by configuring individual accounts for crew members.

BLOCK ALL UNKNOWN USB STORAGE DEVICES

Unknown devices are automatically blocked. Devices can be permitted for a limited time or permanently.

PROTECTS ALL WINDOWS VERSIONS

Supports Windows 7, 10 (all generations), 11, 2008, 2012, 2016 and 2019 server.

REMOTE ALLOW LIST

Upcoming Feature: Pre-authorize new USB devices from shore before sending to vessels. Effectively, creating your own white-list cloud for USB.
